Continuation of 2. NOTE:

Claims 8-11 are extremely functional, confusing, vague, and indefinite. The claims fail to meet the 35 USC 112, 2nd paragraph. The claims recite an ArF excimer laser and a scanning type exposure device without the recitation of any elements to support the ArF excimer laser and the scanning type exposure device. Instead, the claims recite functional language in such a way that it cannot be determined whether the claims are written as a method or an apparatus for laser or scanning device. Furthermore, the claims are written in such a way that it fails to limit or define the invention in order to allow the examiner to provide a proper search within the scope of the invention. Accordingly, the claims are written in such a way that it also fails to comply with 35 USC 112, first paragraph of enablement. So far as the claims are understood, the claims are not patentable over the references of the rejection. Applicant's cooperation is required under 35 USC 112 in order to process this application.
